Vertical Coal Mill

BEIJING JINMEI ENTREPRENEUR IMPORT & EXPORT CO., LTD was founded in February 2006. Taking advantage of its professional and experienced technology in industrial equipment area, it has achieved remarkable success in field of mining equipment, cement equipment and metallurgy equipment.

Providing satisfied products for customers is our unchanged aim. For many years, we've been engaged in exporting spare parts and entire set of crusher, ball mill, vertical mill and furnace, which are widely used in the area of mining industry, cement industry and power industry. On the basic supply of spare parts to OM, TESAB, BABCOCK, KHD, LAFARGE and other companies, we gradually set foot in machine equipment and successfully exported coal mill and cement furnace into Germany and France. Meanwhile, we provide coal mill spare parts for Italian Enel Power Company and Croatian HEP Corp Group through MGM.

With years' painstaking effort, our products have ranged among German BABCOCK MPS series (namely ZGM series in Beijing Power Equipment Group), MPS and MP series in Shenyang Heavy Industry Group), ABB series (namely HP803, HP863, HP903 in Shanghai Heavy Industry Group). Our top-ranking quality and exquisite service are rewarded by customers' praise.

DJM is expanding its scale during its growth, by transforming initialed trade company mode to integrated technology entity with trade, technology and production together.

Following the code of "enterprising, honesty, preciseness, solidarity", members of DJM continually innovate on the base of technology and quality; sincerely serve for clients by highly regarding them. We wholeheartedly offer you products with best quality and lower price and meticulous service.

《Quality Guarantee》

Technology originally introduced from Germany, roller material is Ni-Hard IV and Ni-Hard II, hardness is HRC59. With years' manufacture experience, now we adapt high chrome wear-resisting material with hardness HRC60-63. The fact proves that the life-span of spare part has greatly enlarged. Presently, roller produced by us can reach the life-span more than 10000hr ($Ke \leq 2.5$)
